

# Isn't It Time For A Better Portion Control Scale?

## Then Consider The Doran Advantage With The PC400 Portion Control Scale!

Sure you could spend less money for a portion control scale, use it until it breaks and buy another cheap scale. But when you consider the costs of inaccurate weighing and productivity down time, does this really make **dollars and sense?**

## These are the Doran Advantages!

Doran Scales is legendary for designing and manufacturing portion control and food service weighing equipment that outperforms the competition in even the harshest environments. Sure they cost more, initially, but the savings to you in increased accuracy, long lifespan and less down time add up to an incredible value! The PC400 simply outperforms the competition with:

- Stainless Steel Construction (wipe down safe)
- Legendary Doran Quad Spring Overload Protection System
- 5 Units Of Measure including LB, OZ, KG, G & LB/OZ
- AC or Battery Operation with up to 13 hours of portable operation with a 4 – 6 hour recharge cycle
- RS-232 Serial port for easy interface with printers or efficient data collection devices
- Legal For Trade NTEP Approved (5, 10 & 20 lb.)
- NSF Approved

Sure the PC400 cost more, **initially**, but the savings to you in increased accuracy, long lifespan and less down time add up to an incredible value!

## What are you waiting for?
