MVP Series

General Purpose Bench Scale

Doran's MVP Series Scales provide the flexibility to meet your most demanding weighing tasks. Choose from the basic indicator/base configuration, or the complete stand-alone system using the optional column, wheel casters, or conveyor top. If economy, reliability and ease of use is important, you'll be glad to have a Doran MVP Scale on your team!

► Value

The MVP Series couples the DS100 Digital Weight Indicator with the DMS Mild Steel Bases, resulting in an economical scale system for most any weighing application. Select from three base sizes 18" x 18", 18" x 24", or 24" x 24", capacities up to 1000lb, a full line of options, all with a one year warranty.

► Accuracy

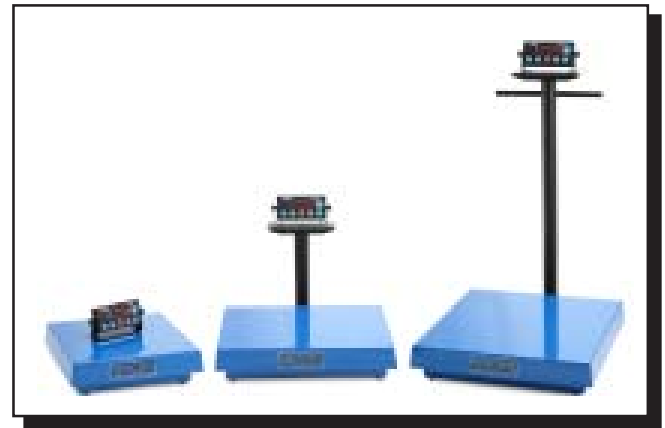

Superior accuracy is achieved through Doran's superior design. This is where our 30 years of experience really counts! Premium load cells and a rigid full frame base construction result in phenomenal weighing performance throughout the entire capacity range. The Doran MVP series is NTEP approved and legal for trade at 5000 divisions, with models providing resolution of up to 10,000 divisions and higher for non-commercial applications.

► Extremely Rugged Construction

The sturdy, welded tube mild steel frame of the base is designed to withstand the use and abuse of extreme industrial applications. Seven overload stops provide outstanding load cell protection, ensuring years of trouble-free operation. The two part Polyurethane paint provides excellent wear and abrasion protection.

► Easy Operation

Simple and intuitive operation with UNITS, PRINT, TARE, ZERO (On/Off) and GROSS/NET. A bright, easy to read LED display provides excellent readability in a wide variety of lighting conditions and angles - up to 25 feet away.

The MVP Team Lineup (pictured l. to r.):

Basic Model with 18" x 18" base, Benchtop Model with an 18" x 24" and optional 16" column, & the Floor Scale Model with a 24" x 24" base and optional 36" column.

SPECIFICATIONS
